

# TRANSFORMATIVE EDUCATION TO SHAPE THE FUTURES OF CLIMATE CHANGE

*Our current way of life is unsustainable and has destabilising effects on our environment.*

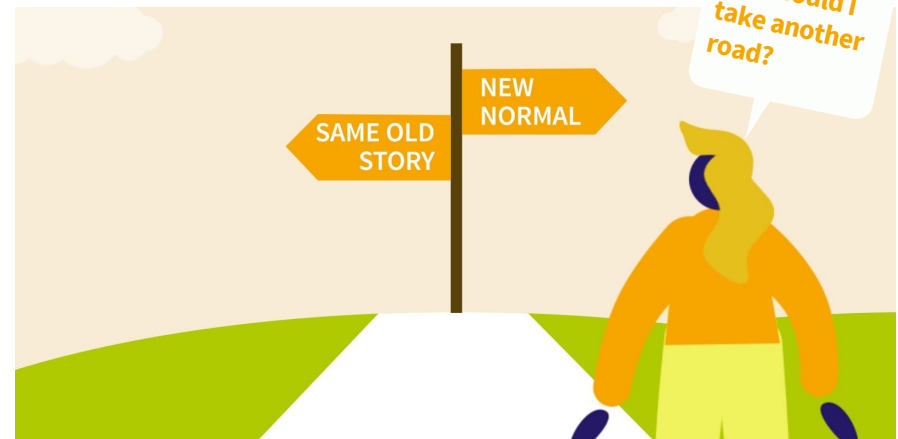

*If we don't start dealing with climate change with appropriate policies, we could see irreversible damage to global climate systems by 2050.*

Effects of  
climate change

Impact us all

*In the last few years, global climate movements were created to protest. But some citizens still need the tools to take part in reflections and actions at the local, national and global levels.*

*To face global challenges, we need transformative education in and out of schools. For learners of all ages.*

## Transformative Education

*Transformative education requires both learning and...*

*...unlearning by participants.*

*When understanding better the complexities of the world, learners acquire the tools to identify, design and implement transformative actions at all levels.*

Think Critically

Understand Impacts

Empowered Action

*They can become engaged in making the world a better place.*

## **ABOUT BRIDGE 47**

Bridge 47 was created to bring people together to share and learn from each other. We mobilise civil society (NGOs) from all around the world to do their part in creating a more fair, peaceful and equitable world with the help of Global Citizenship Education.

Co-funded by  
the European Union
